

Setting up TextEdit

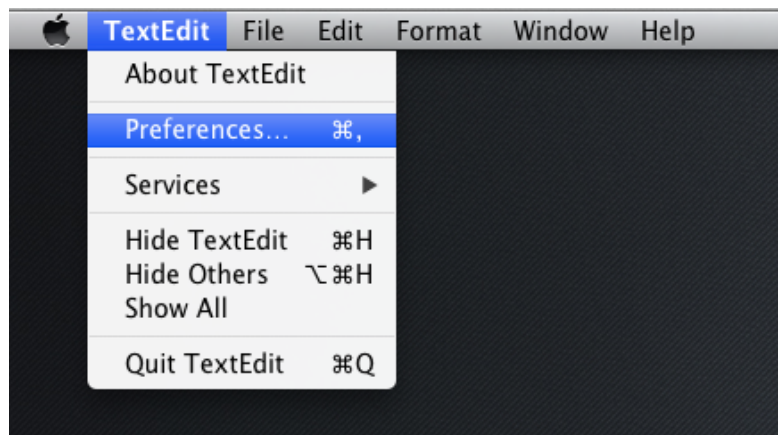

1) Launch TextEdit – To launch **TextEdit**, click on the magnifying glass on the upper right corner of the screen and type **TextEdit**. Click on **TextEdit** with your mouse or hit enter.

2) You should see something like this.

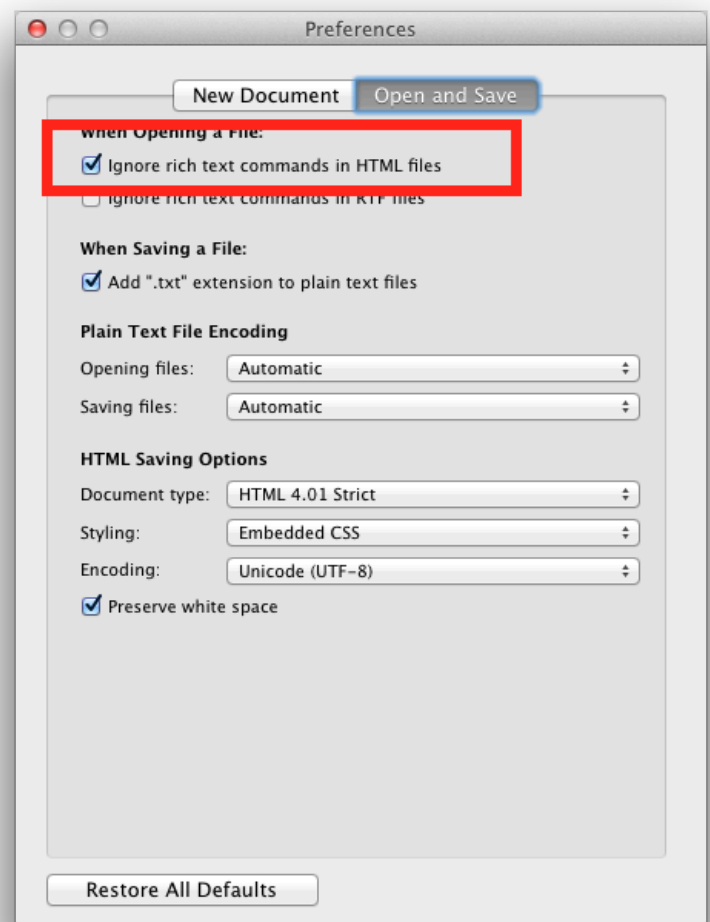

3) Click TextEdit >> Preferences from the toolbar

4) A dialog like the one below should pop up. If the **Open and Save** tab is not already selected, click on that tab.

5) Make sure the box next to Ignore rich text commands in HTML files is checked.

6) Now close this dialog, by hitting the red circle button at the upper left corner of the dialog. You're all set and ready to start creating your website.
